

Second Conference April 24-28 2006

Learning objects – repositories, networks and cooperation – status in the Nordic-Baltic countries

How can we exchange our experiences – and how can we even exchange learning objects? Is it a good idea to build a learning object network, and start the discussion about a joint bank of learning objects? The conference will focus on databases and peer to peer network for learning objects in a Nordic-Baltic perspective.

What?	Who?
Quality is a moving target - defining quality criteria for online learning resources	Liisa Lind, producer, National Board of Education, Finland
Sharing learning resources. Network and consortia - joint access and use of electronic subscription and databases in the field of engineering.	Sveinn Olafsson, administrator Iceland Consortia and Jón Skúli Indriðason, consulting engineer at Linuhonnun:
FEL FEL – annat tema??? Democratic networks of learning objects with support from exchange of experience	Mikael Nilsson???, senior researcher, Royal Institute of Technology (KTH):
Developing learning objects – introduction to easy production of interactive online learning materials and publishing on Internet. Sharing learning objects – and future visions	Kaj Engen Nielsen, project manager, Center for Fleksibel Voksenuddannelse, Sønderjylland:
Overview of Learning Objects in Estonia	Sirje Virkus, researcher, Tallinn Pedagogical University:
Learning Resources – how are they used in Learning? Some reflections after a small Norwegian project aiming at bridging the gap between the library and educational communities.	Tore Hoel, project manager, e-standar -project, Høgskolen i Oslo :
