

"What is Creativity -
Innovation?
Can it be learned?"

Niels Henrik Helms,
Knowledge Lab, SDU

ORIGIN mid 16th cent.:
from Latin innovat-
'renewed, altered,' from
verb innovare, from in-
'into' + novare 'make new'
(from novus 'new').

KnowledgeLab

010010110110110011011101101101101101100011001011001000110011101100101
011011000110000101100010

- Background

Creativity & Innovation - as a
problem in education

Creativity as a floating designator

SYDDANSK UNIVERSITET

KnowledgeLab

010010110110110011011101101101101101100011001011001000110011101100101
011011000110000101100010

Beyond Understanding?

"On the relation of analytic psychology to poetic art," Carl Jung (1933) leaves open all definitional possibilities: Any reaction to stimulus may be causally explained; but the creative act, which is the absolute antithesis of mere reaction, will forever elude the human understanding. (p. 23)

SYDDANSK UNIVERSITET

KnowLEDGElab

01001011011011001101110110110110110001100101100100011001101100101
011011000110000101100010

Definition:

Nonetheless, venturing a general definition of the concept of creativity, a tentative bid could be:

Turning potentials into accepted new form(s).

SYDDANSK UNIVERSITET

KnowLEDGElab

01001011011011001101110110110110110001100101100100011001101100101
011011000110000101100010

Explained

Meaning that we do need to have something (potentials), which should be given form - This form should be new otherwise it might be appropriate but not creative. This form should then again be accepted. Accepted means not necessarily accepted as - but that this very form will be considered.

SYDDANSK UNIVERSITET

KnowLEDGElab

0100101101101100110111011011011011000110010101100100011001101100101
011011000110000101100010

So..

- In short, we may characterize innovation as turning new forms into accepted new practices; or to put it more simply: innovation is turning creativity into new practice(s).

SYDDANSK UNIVERSITET

KnowLEDGElab

0100101101101100110111011011011011000110010101100100011001101100101
011011000110000101100010

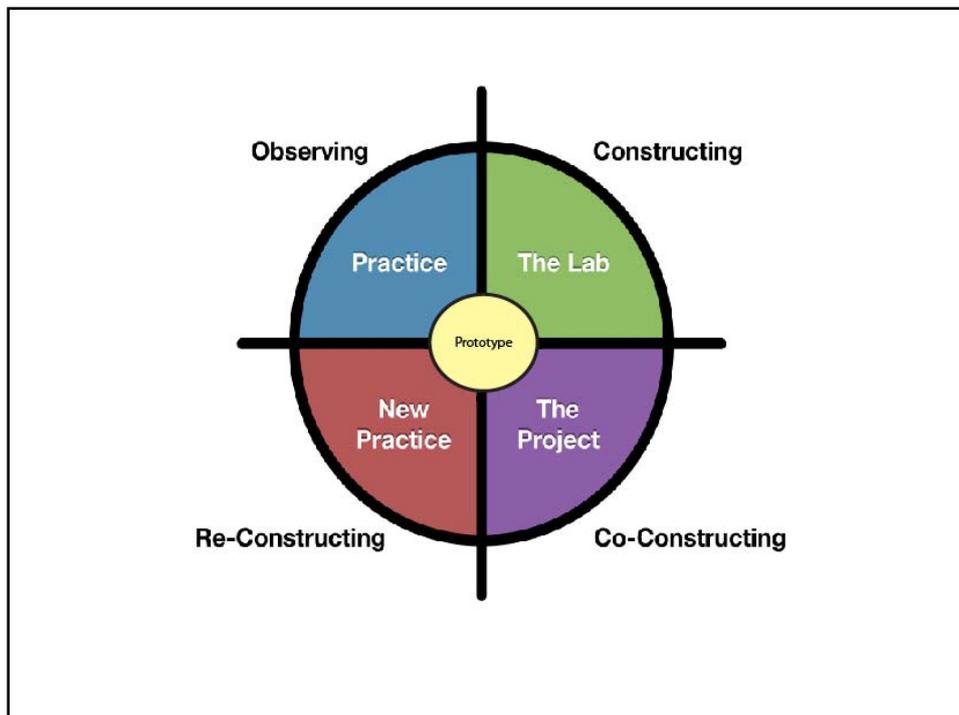

The Creative Set-Up

- A kind of practice
- How do we understand practice and learning
- How do we understand practice and creativity/innovation

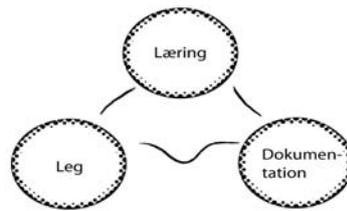

KnowledgeLab

0100101101101100110111011011011011000110010101100100011001101100101
011011000110000101100010

A Case Story

SYDDANSK UNIVERSITET

0100101101101100110111011011011011000110010101100100011001101100101
011011000110000101100010

SYDDANSK UNIVERSITET
KnowLEDGElab

0100101101101100110111011011011011000110010101100100011001101100101
011011000110000101100010

Case Story

Communities of Practice (COP's)

Lave and Wenger:

A community knitted together by:
Mutual engagement, Joint
Enterprise and Shared Repertoire

Sensemaking thorough:
Participating (Socializing) and
Reification (stabilizing)

SYDDANSK UNIVERSITET
KnowledgeLab

01001011011001101110110110110001100 0101100100011001110100101
0110110001100001011100010

Legitimate Peripheral participation

These practices reduce complexities, they move towards sameness

A way of doing sustained by canons of good practice (a normative accountability) (Gherardi 2009)

KnowledgeLab

01001011011011001101110110110110110001100101100100011001101100101
011011000110000101100010

Vs Communities of Interest (COI's)

- They are looser, and they are also characterized by difference rather by uniformity. From the outset, the participants are embedded in different domains (or COI's)
- they come together mobilized by the challenge of developing newness - This newness and the challenge, which in the different domains will be interpreted in different ways, generate the need for a conceptualization distinct from that of communities of practice.

KnowledgeLab

01001011011011001101110110110110110001100101100100011001101100101
011011000110000101100010

Not Cross Diciplinarity

- Rather speaking about *multi-disciplinarity*, using differences, rather than cross-disciplinarity, which would mean focusing on sameness.
- When actors work together in zones in the intersection of domains in a special creative and innovative context, we need materiality or mediating artefacts.

KnowLEDGElab

01001011011011001101110110110110110001100101100100011001101100101
011011000110000101100010

Communities of Interest

Based on Difference
Transforming Complexity
An Ontological Endeavour
Performative Practice
- a Performative Cannon (vs. a
normative accountability)

KnowLEDGElab

01001011011011001101110110110110110001100101100100011001101100101
011011000110000101100010

Concluding -1

- Legitimate Participants
- Authentic Settings
- Authentic Evaluation
- Empowerment through Competence

KnowLEDGElab

0100101101101100110111011011011011011000110010101100100011001101100101
011011000110000101100010

Innovation and Creativity is learned through

Participation

Authentic Settings

Constraints - The Design

Outcome:

A product or response will be judged as creative to the extent that (a) it is both a novel or valuable response to the task at hand, and (b) the task is heuristic rather than algorithmic

(Amabile p. 35)

KnowLEDGElab

0100101101101100110111011011011011011000110010101100100011001101100101
011011000110000101100010

In this Project

- The participants were working in DESIGN MODE
- When in design mode, we are concerned with the usefulness, adequacy, improvability, and developmental potential of ideas - THIS ONLY HAPPENS TO A LIMITED DEGREE IN EDUCATION

KnowledgeLab

01001011011011001101110110110110110001100101100100011001101100101
011011000110000101100010

VS. Belief Mode

- In education belief mode is on the agenda, we are concerned with what we and other people believe or ought to believe
- SCHOOLS/EDUCATION IS VERY GOOD AT THIS
- EDUCATION IN THE KNOWLEDGE SOCIETY MUST WORK IN DUAL MODE - GENERATING DUAL COMPETENCIES

KnowledgeLab

01001011011011001101110110110110110001100101100100011001101100101
011011000110000101100010

Into the Heart of Education

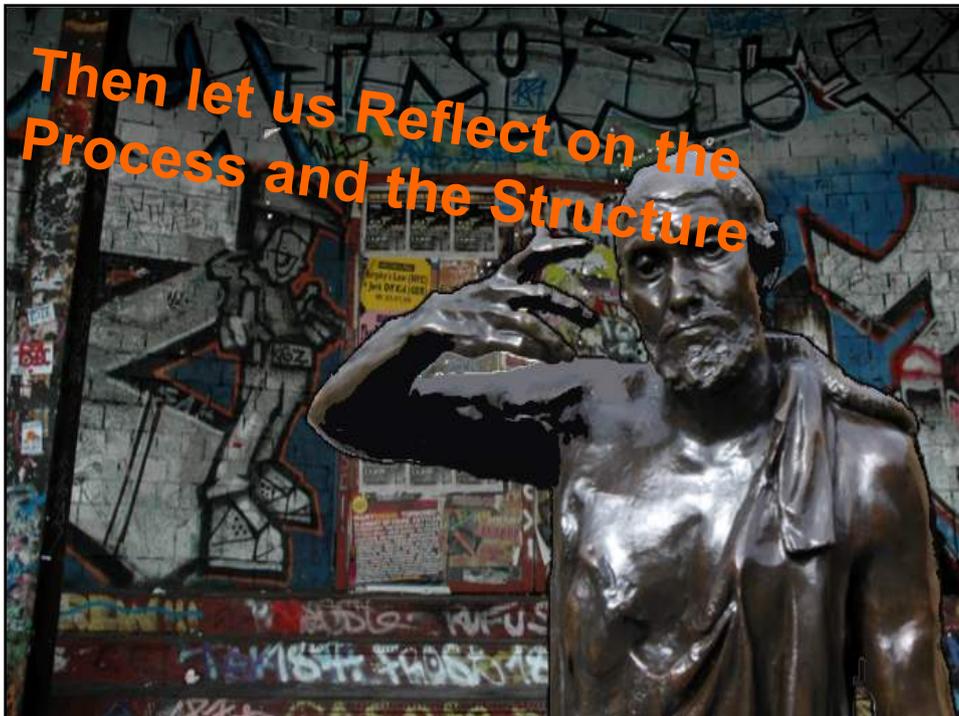

" Activity in the design mode is not absent from schools. It is to be found in crafts, dramatic productions, creative writing, and the increasingly ubiquitous "project." In many of these the focus is on creating artifacts, but the artifacts are not *conceptual* artifacts.."

"They must bring the design mode into the heart of the educational program instead of relegating it to extracurricular or peripheral activities" (Bereiter and Scardamalia 2003)

SYDDANSK UNIVERSITET
KnowledgeLab

0100101101101100101110110110110110001100101100100011001101100101
011011000110000101100010

The Creative Genius?

"In my opinion, creativity is completely involved with limitations.

For instance, even in our childhood, when we want to draw something, there is a limitation concerning the paper.

All sorts of creativity are concerned with the specification of our limitation.

Drawing, writing or whatever..

.. Creativity is our limitations." (Ozcan 2004)

(Picture Credit: http://blogs.indiewire.com/theplaylist/magnolia_gets_apocalyptic_picks_up_lars_von_triers_melancholia)

- Mastery (ANDERS K ERICSSON)
- Estrangement - Biosociation (Koestler)
- Programme (Idiosyncrasy vs. isomorphic pressure)(Alvarez2005)
- Double double competence (Helms)

Tentative Components

- Ålen and von Trier
Dogme/Zentropa
- René Redzepi and
Claus Meyer :NOMA
- Mark Elliot
Zuckerberg and Sean
Parker :Face Book
- Olafur Eliasson and
Einar Thorsteinn :
Eliasson Studio
- Mastering
- The
estrangement
- The programme
- The
organisation
- Double
competencies

SYDDANSK UNIVERSITET
KnowledgeLab

01001011011011001101110110110110110001100101100100011001101100101
011011000110000101100010

How does these four set ups avoid the isomorphic pressure

- Mastering
- The estrangement
- The programme
- The organisation
- Double competencies

SYDDANSK UNIVERSITET
KnowledgeLab

01001011011011001101110110110110110001100101100100011001101100101
011011000110000101100010

Different Contexts for Learning

- Different Practicesses: Emphasize rules, values, criteria for evaluation - Contextmarkers

KnowLEDGElab

0100101101101100110111011011011011000110010101100100011001101100101
011011000110000101100010

A School is a School is a School

- Creating distinction to other contexts
- Developing a language for reflection on own practice through meeting otherness
- Immersion: Enabling non-reflection: doing, doing, doing - generating mastery
- Changing Contexts: Re-doing

KnowLEDGElab

0100101101101100110111011011011011000110010101100100011001101100101
011011000110000101100010

Concluding

- Developing a living curriculum - challenging and directing and opening up for learning
- Change between different contexts for learning
- Empowering learners as authentic knowledge workers
- Change between belief mode and design mode
- Multi **Disciplinarity**
- Evaluation where scholastic as well as non-scholastic dimensions are involved
